

Instructional Area Improvements at North and South Campus

- Instructional areas and technology infrastructure must evolve to meet the expanding needs of students, 2-year and 4-year college expectations, and the changing workforce and workplace demands.

- Renovation of classrooms, Special Education areas with real-world transition spaces, science labs, student services, and library/media/technology areas to improve ADA accessibility, safety, flexibility, and collaboration.

- Increase the size of several classrooms that are well under the standard for the square footage of today's classrooms and current class sizes.

North Campus- 50-year old equipment labs

South Campus- New manufacturing & design

- Renovation of traditional Technical Education spaces at North Campus into a Design Engineering Manufacturing Center, similar that that at South Campus, to meet the need for career-ready programs.
